FOR IMMEDIATE RELEASE

Traffic Control at Cayton Creek Highway Project

REDDING – The California Department of Transportation (Caltrans) District 2 advises motorists traveling State Route (SR) 89 in Shasta County of delays up to 30 minutes due to traffic control 24 hours per day, seven days per week for the Cayton Creek Highway Rehabilitation project. The project begins just north of the Lake Britton Bridge and continues to the Siskiyou County line.

The project will bring this section of roadway up to current highway design standards. Work will include rehabilitation of distressed pavement, replacement of the Cayton Creek Bridge and improvement to drainage. Safety improvements will include curve enhancements, upgrade of existing guardrail, sight distance improvements, pavement corrections, construction of a left turn pocket at Dana McArthur Road and a passing lane south of Dana McArthur Road.

The contractor for this \$22 million project is Steve Manning Construction Incorporated of Redding.

Motorists are asked to use caution when traveling through the construction area and are reminded to "Slow for the Cone Zone".
